

Po-Sheng Cheng

Portfolio Highlights

Hardware Projects

Full Portfolio Link:

<https://bencer3283.github.io/art/>

MITM Router

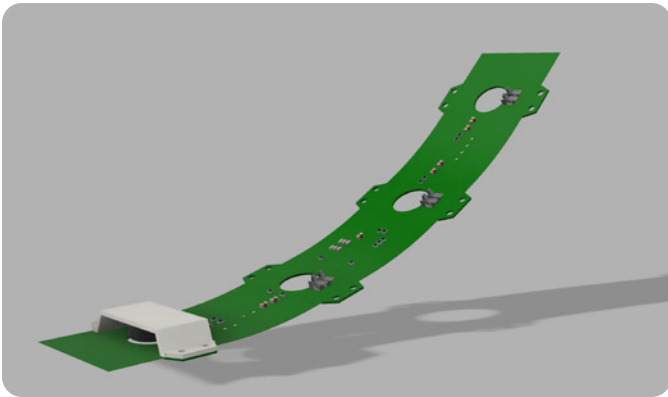

an interactive WI-FI router

Raspberry Pi 5 running Linux networking stack
ESP32 and RP2040 microcontroller
7+ peripheral sensors, actuators or ICs

Haptic Belt

using haptic feedback to provide navigation for visually impaired people

Rigid-flex PCB design with Altium Designer
Power integrity analysis
STM32 firmware programming ([Github Repo](#))
RF circuit design

PageMate

a smart bookmark that bridges physical and digital books

ESP32 microcontroller
Extensive use of I2C
Custom IC for touch gesture sensing
